

# Cities Digital Rights Helpdesk

## Support local digital rights efforts of cities

With a worldwide network of over 50 cities, the Cities Coalition for Digital Rights is helping each other in the greenfield of digital rights based policy-making. The Digital Rights Helpdesk will support city-governments in addressing the ethical or digital rights aspects of their local digital strategies, policies and projects. Cities can:

- Request for a team of international experts that sets up a local Digital Rights Governance Framework.
- Get feedback on local strategies and policies from an expert-community.
- Learn how to set up a local Digital Rights Helpdesk.

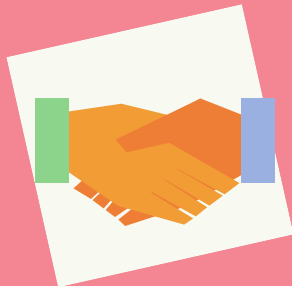

## Join us as ...

### Advisor

Join this effort to create an 'out-of-the box' network of advisors for municipalities worldwide. Researchers, experts, creatives, Makers, civil servants and citizens can sign up as advisor to this helpdesk.

### Partner

We invite organizations and communities, interested in promoting and defending digital rights in an urban digital environment, to collaborate with the Coalition in co-creating or communicating this helpdesk.

### City

As local government you can boost this initiative by motivating your local experts to sign up as an advisor to the helpdesk or by sharing your local digital rights policies and questions for feedback.
