

Speaker Information

Wolfram Auer, Doppelmayr Seilbahnen GmbH

Wolfram Auer is employed at Doppelmayr Seilbahnen GmbH in Wolfurt Austria. Working in the field of business development and sales, his target is to implement cable propelled transit systems in cities as part of public transport networks or to connect POIs. He was trained in geography and has fourteen years of experience in ropeway projects as well as knowledge about spatial planning and public transit issues. Wolfram sees a high potential for cable cars to become a major key factor to solve mobility problems in urban agglomerations. His objective is to raise awareness about this innovative and smart transport mode while he is well connected within the global transport scene.
