Supporting planning for
INTEGRATED REFUGEE & HOST COMMUNITIES

UN-Habitat organizes a Discussion on the Theme of Economic connectivity, refugees and migrations, and urbanization along East Africa’s Regional Economic Corridors

In collaboration with Kenya’s North Rift Economic Bloc (NOREB), Turkana County and Cities Alliance, UN-Habitat organized on 8th June 2021 a regional virtual workshop on “Sustainable Economic Development Along Turkana West Development Corridor through Enhanced Connectivity.”

The workshop brought together around sixty participants representing three countries (Kenya, South Sudan, and Uganda), regional governments, NOREB counties and Secretariat, urban centers along the A1 Road, the LAPSET Corridor Development Authority (LCDA), and UN agencies working in North Rift Kenya in addition to representatives from National Governments, development and humanitarian partners, business representatives, and local organizations. The LAPSET corridor links Kenya (from the port of Lamu) and South Sudan through the Kakuma-Kalobeyei refugee settlement area in Turkana West (Turkana County). The A1 road links Kenya to South Sudan (this section of the Northern Economic Corridor links the port of Mombasa in Kenya, with Eastern and Central Africa regions). Through the partnership of Cities Alliance, Turkana County, and UN-Habitat, spatial and development planning is ongoing to position the Kakuma-Kalobeyei area along this corridor strategically.

By focusing on the two ongoing regional infrastructure projects of A1 Road and the planned Lamu Port South Sudan Ethiopia Transport (LAPSET) economic corridor, the meeting aimed to facilitate critical policy discussions among the stakeholders concerning the emerging opportunities and challenges that migrations and rapid urbanization present to socio-economic development in the region.

In his statement during the opening session, Uasin Gishu County Governor and NOREB chairman, H.E Jackson Mandago-Egh stressed the importance of “implementing contemporary urban planning which meets the aspects of sustainability and addresses the dynamics of present-day and future cities.” Acknowledging the fundamental role that counties will play in light of the rapid urbanization, Solomon Ambwene from Kenya’s State Department of Housing and Urban Development stated that the Corridor is “becoming a magnet for investment, ...counties should have proper plans and strategies to avoid past failures in managing growing cities and towns”. He also emphasized that the LAPSET corridor has the potential to configure another urbanization and economic corridor in the region, as witnessed with the Northern economic corridor.

Herman Pienaar from UN-Habitat reiterated the importance of urban planning in a region facing many opportunities and challenges, emphasizing the people-centered approach in promoting investments that resulted in inclusive development. Florence Lozet from Cities Alliance highlighted the importance of the joint programme with UN-Habitat, designed to “strengthen the local economy, explore how cities can be connected to promote regional development and promote the integration of migrants and refugees” along the corridor.

UNHCR representative Kahin Ismail presented an overview of the Kalobeyei Integrated Socio-Economic Development Programme (KISEDIP). He stressed the importance of “taking the programme to the next level” by partnering with municipalities to lead the planning processes, providing financial autonomy to refugees who are now receiving cash, and promoting the economic integration (of refugees and host community) by collaborating with the private sector.

The first session focused on current migration and urbanization debates. It discussed the impacts of increased regional and cross-border migration and urbanization that will likely accompany increased connectivity. Contributions included speakers representing Uasin Gishu, Trans-Nzoia and Turkana counties, NOREB representatives, the Kenya...
government, and UN-Habitat. The afternoon session addressed avenues for achieving increased regional economic connectivity and inter-linkages within the region. The speakers included representatives from LCDA, local governments, the Kenya National Chamber of Commerce regional branches, and government representatives from South Sudan and Uganda.

Participants acknowledged the importance of the workshop content, which was considered fundamental in information and experience sharing. They expressed interest in creating a regional alliance of cities and towns that address sustainable urbanization and development along the corridor and the NOREB region. UN-Habitat announced that a second forum is foreseen in the coming months. The ongoing spatial and development planning work in Turkana West and policy issues emerging from the project activities will be shared, and a conversation of longer-time engagement will be discussed.

This meeting falls in the context of the UN-Habitat and Cities Alliance project “Sustainable Economic Development Along Turkana West Development Corridor Through Enhanced Connectivity.” Turkana, as explained by Baraka Mwau from UN-Habitat, “plays a strategic role considering the two major corridors that are converging in the county.” The Swiss Agency for Development and Cooperation finances the project.

Post World Refugee Day Celebrations: Planning Sustainable and Inclusive Settlements for All

More than a year has passed since COVID-19 was first reported in Kenya in early 2020. Last year, instead of singing and dancing, refugees from Kenya had joined in a virtual celebration with host communities that included participants from around the country. Over the last weekend, as the COVID-19 pandemic continues, the celebrations will again be held virtually.

UN-Habitat’s initial support was rendered through providing technical expertise to plan and map quarantine centers and temporary hospital facilities to increase the preparedness of the refugee settlements. In these exercises, urban data was collected, analyzed, and provided recommendations to UNHCR and partners.

From the start of the year, UN-Habitat has continued to provide technical expertise to support the planning of the Kakolobei Settlement, the regeneration of Kakuma, and broader regional development through various activities. As in-person meetings were banned, UN-Habitat has had to think outside of the box to cater to virtual meetings or to ensure social distancing measures are implemented where possible. The latest activities include:

- June 2021 - UN-Habitat, Cities Alliance, and Kenya’s North Rift Economic Bloc (NOREB) organized a regional virtual workshop on “Sustainable Economic Development Along Turkana West Development Corridor through Enhanced Connectivity.”
UN-Habitat and UNHCR lead discussions during CCCM Practitioners Day 2021

UN-Habitat joined global practitioners in the Camp Coordination and Camp Management’s (CCCM) Practitioners Day 2021 was an open forum for an informal exchange of ideas, sharing initiatives and best practices on camp coordination and management, encouraging cross-pollination of ideas and collective learning. UN-Habitat presented the Settlement Profiling Tool co-developed with UNHCR and engaged in discussions on participatory approaches in settlement planning in a ‘new normal’. The session focus for UN-Habitat was to share our approaches and hear feedback from experienced practitioners around the world to further improve upon the agency’s methodologies – as part of the commitment to ensuring sustainable settlements from the host and refugee communities in Kakuma-Kalobeyei, as well as in other refugee affected areas globally.

This year, the focus of World Refugee Day is on the power of inclusion - the shared experience of COVID-19 has shown that communities can only succeed if they stand together.

UN-Habitat is proud to stand with partners to address the gaps for a more inclusive and equal world, one where no one is left behind. One such project is the design of the shelter typologies with Shigeru Ban, which had left an impact on a refugee-builder who engaged in the program:

“I have passed through several refugee camps, and I have never witnessed an organization that is willing to construct refugee homes that are strong and attractive, and that if someone had come, they would feel at home.” Said Nimbona Isaac, a refugee from Burundi who is currently living in Kalobeyei Settlement, Village 2. “We built the houses with a big group of people, a mixture of refugees and Turkana people who collaborated in constructing the houses. Earlier on, we used to fear living with other people as their cultures were different from ours, but we have started to integrate as we now see that our lives are similar. Thanks to UN-Habitat, we feel we are not displaced but have a home. Thank you.”

Since 2016, UN-Habitat, initially through the support from the Government of Japan, has implemented and advocated for sustainable infrastructure solutions such as the design and construction of public spaces, a community center, rain-water harvesting technologies, road rehabilitation, shelter design, renewable energy, and livelihood skills development. These projects have leveraged the opportunities and benefits to support local economic growth, making Kalobeyei an example that strengthens the triple nexus and commitment to the global agendas.

UN-Habitat has been supporting the Kalobeyei Integrated Socio-Economic Development Programme (KISEDIP) through coordination with Turkana County Government and UNHCR. UN-Habitat’s Humanitarian-Development workstream Programmes are supported by the Government of Japan, the Swiss Agency for Development and Cooperation (SDC) through Cities Alliance, and the EU Trust Fund for Africa.
In discussion with Bruce Spires from CCCM on the role CCCM can support in the settlement profiling process, John shared a need for the multi-sector, multi-agency, multi-actor buy-in, and the CCCM initiative and support is required. Jonathan echoed this and explained that CCCM has a “diverse perspective of issues,” which is necessary to support a comprehensive picture of settlement profiling development.

In the succeeding presentation, Bernard Heng from UN-Habitat shared an ongoing normative work: Participatory approaches in the Camp/ Settlemnet Planning in the ‘New Normal,’ exploring UN-Habitat’s past participatory practices in Kalobeyei Settlement to inform future participatory activities. More importantly, the work has been heavily informed by field activities experience during the COVID-19 pandemic.

The presentation focused on the evaluations and recommendations of participatory approaches in planning processes. Chiefly, in the past five years of conducting participatory activities in Kakuma-Kalobeyei, UN-Habitat saw the opportunity to elevate community participation further and provide both host and refugee communities more control over decision-making processes.
UN-Habitat participates in quarterly KISEDPS Spatial Planning and Infrastructure Thematic Working Group Meeting

UN-Habitat joined UNHCR, NCCK, and other partners on the KISEDPS Spatial Planning, Infrastructure Development and Shelter quarterly Thematic Group Coordination meeting with Turkana County Government. The meeting was chaired by County Executive Committee Member (CECM) Lands, Energy, Housing, and Urban Areas Management, Esther Lokwei, and held in strict observance of COVID-19 protocols.

CECM Esther Lokwei welcomed partners and provided an update about the progress in achieving municipality status for Kakuma-Kalobeyei. She added that UN-Habitat has significantly been supportive and has closely assisted Turkana County Government in the approval process of the Kalobeyei Advisory Development Plan. CECM Esther Lokwei further shared that she will work with the County Chief Officer for Lands, Energy, Housing, and Urban Areas Management, Dr. Joshua Lemuya, to support the Kalobeyei Advisory Development Plan’s approval process. She explained that the approved spatial plans would help guide the county officers.

UN-Habitat provided an overview of ongoing contributions under the KISEDPS framework to partners and the Turkana County Government.

UN-Habitat holds a virtual workshop on Creating Diaspora Networks in the Apparel, Basketry, and Beadwork Industry.

In collaboration with LAWY AFRIK, Turkana County Government, and Cities Alliance, UN-Habitat organized a virtual workshop, Creating Diaspora Networks in the apparel, Basketry, and Beadwork Industry on 9th July 2021. The workshop was part of the project Sustainable Economic Development Along Turkana West Development Corridor Through Enhanced Connectivity. The programme focuses on addressing the socio-economic development of the refugees and host population residing in Turkana West. It looks at building soft infrastructure that can support the local community and exploit and leverage opportunities that are likely to emerge from the improved connectivity and networks associated with Lapset and the A1 road.

The workshop aimed to create a platform for networking for the business community associations, strengthen capacities, and enhanced awareness of migration and urbanization through the multi-stakeholder development forum. It involved developing and supporting linkages between local entrepreneurs in various industries, business associations, local leaders, and marketers.
in the diaspora. As a result, they will share knowledge on products and markets, enhance their competitiveness and expand local value chains to open access to international markets.

Overview of the project was presented by UN-Habitat representative Baraka Mwau. He mentioned that the transportation infrastructure in Turkana West is crucial to the businesses that are there. Turkana county is strategically positioned as a future transit to economic flows exchanged between Kenya and Uganda, South Sudan, and Ethiopia creating a regional linkage.

The transport infrastructure also comes with fiber optics cables that will improve internet connectivity that will come in handy for better communication and marketing.

The presenters explicitly highlighted the challenges and opportunities facing SMEs; they mentioned that SMEs are essential to the economy and play a crucial role in the economic development of any county.

Governments and multilateral institutions recognize the SMEs as they are fundamental to employments, promote development growth, are flexible, provide products and services to the communities, drive industrialization, and develop skills of the people example as managers. Several challenges facing SMEs were alluded to included inadequate access to marketing platforms, lack of access to new technologies, and credit and cumbersome regulatory practices that make them operate as unlicensed practices.

Several recommendations to improve the sector were put forward. They included leveraging the e-commerce and digital marketing platform, research and development of superior quality products, commitment to customer satisfaction through studying the market, and the government to support these businesses by developing policies for upgrading to global value chains. The participants acknowledge the importance of the workshop content, which had facilitated sharing information and experience, explored key opportunities and challenges, and possible partnerships to create sustainable diaspora networks that would support local economic development.

Completion of community engagement to inform Kakuma-Kalobeyei Visioning and Regeneration Strategy

Over the past four months, UN-Habitat has been undertaking virtual workshops with members of the host and refugee communities in Kakuma and Kalobeyei, Kenya, supporting the EUTF funded project “Enhancing self-reliance for refugees and host communities in Kenya.” These workshops were to inform the Kakuma-Kalobeyei Visioning and subsequent Regeneration Strategy, building on the findings of the Kakuma-Kalobeyei Spatial Profile published in June 2021.

A total of 8 workshops were completed engaging over 30 members of the host and refugee communities in Kakuma-Kalobeyei. A Community Planning Group (CPG) was formed in Kakuma Town, Kakuma Refugee Camp, Kalobeyei Integrated Settlement, and Kalobeyei Town, and two 1.5 hour virtual workshops were conducted with each CPG. Due to the COVID-19 pandemic, virtual workshops were the most feasible option to achieve community engagement while adhering to movement and social gathering restrictions. While differing from in-person workshops, the virtual workshops generated vibrant discussions, and specific challenges within the settlements could be spatially located on a virtual map.

The purpose of the sessions was to understand from the host and refugee community perspectives what the challenges and opportunities of Kakuma-Kalobeyei were. Challenges were revealed to be shared across all four CGPs, such as the disruption and damage caused by flooding and the need for additional health and education facilities.

It was acknowledged across the groups that one of the greatest strengths of Kakuma-Kalobeyei was the positive relationship between the host and refugee communities and the integrated economy that has developed between the two communities.
Looking to the future, a common goal across the CPGs is for Kakuma-Kalobeyei to become a place where both the host and refugee communities can access education and training opportunities to improve their livelihoods, increase their self-reliance and develop their communities.
