Every year UN-Habitat and partners organize a month of activities, events and discussions around urban sustainability in October. This year’s Urban October focused on the climate crisis – also the focus of UN-Habitat’s current campaign, Cities4Climate. The month began with World Habitat Day on 4 October with the theme: Accelerating urban action for a carbon-free world. The hybrid Global Observance will take place in Yaoundé, Cameroon; readers here to begin the action and ask questions or watch livestream.

Urban October draws to a close with World Cities Day on 31 October 2021 focused on Adapting Cities for Climate Resilience with the Global Observance located in Luxor, Egypt. Look out for registration and livestreaming details here.

Everyone interested in sustainable urbanization from national and local governments to universities, NGOs and communities is encouraged to host or participate in virtual or physical activities, events, and discussions during the month. Post your 2021 Urban October event on UN-Habitat’s website and keep checking Urban October | Urban October (unhabitat.org).

UN-Habitat Committee of Permanent Representatives Reviews implementation of the Strategic Plan 2020-2023

The Committee of Permanent Representatives (CPR) to UN-Habitat held its first open-ended high-level midterm review since the new Governance Structure for the Strategic Plan 2020-2023 came into place from 29 June to 1 July 2021. Over 300 participants including the then President of the United Nations General Assembly Mr. Volkan Bozkır, the President of the UN-Habitat Assembly Ms. Martha Delgado Peralta, Ministers and Ambassadors took part in the meeting. The UN-Habitat Executive Director gave an update on results achieved so far in the implementation of the first two years of the UN-Habitat Strategic Plan 2020-2023, stressing that the President of the UN-Habitat Assembly Ms. Martha Delgado Peralta, Ministers and Ambassadors took part in the meeting. The UN-Habitat Executive Director gave an update on results achieved so far in the implementation of the first two years of the UN-Habitat Strategic Plan 2020-2023, stressing that UN-Habitat is refocusing its efforts on larger scale interventions on housing rehabilitation and urban recovery. One example with funding from Japan involves the restoration of 11 severely damaged multi-story residential buildings in the heart of Beirut, including critical municipal infrastructure services in Bousa Hamoud. This project will reach around 7,165 individuals directly and 13,000 indirectly. Together with the United Nations family, UN-Habitat continues to contribute to improving living conditions for thousands of people who were directly affected by the explosion and still face hardships.

UN-Habitat’s report, The Abu Dhabi Declared Actions: One year of implementation, identifies a set of 4 recommendations on the implementation of the Abu Dhabi Declared Actions: One year of implementation, which took place in 2021, in Abu Dhabi, United Arab Emirates. The month focuses on the climate crisis - also the focus of UN-Habitat’s current campaign, Cities4Climate. The month began with World Habitat Day on 4 October with the theme: Accelerating urban action for a carbon-free world. The hybrid Global Observance will take place in Yaoundé, Cameroon; readers here to begin the action and ask questions or watch livestream.

The Abu Dhabi declared actions: One year of implementation

The Tenth Session of the World Urban Forum (WUF10) which took place in 2020, in Abu Dhabi, included a call for united action to ensure a sustainable future for cities and citizens. The outcome, known as the Abu Dhabi Declared Actions, includes commitments from international organizations, national and local governments; the private sector; civil society; academia and others for the next two years and beyond to support the achievement of the Sustainable Development Goals (SDGs). A year after WUF10, UN-Habitat invited its partners to share their progress in implementing the Abu Dhabi Declared Actions on the Urban Agenda Platform, an online knowledge portal developed by UN-Habitat for global, national and local stakeholders to share reports, best practices and data on the implementation of the New Urban Agenda.

UN-Habitat’s report, The Abu Dhabi Declared Actions: One year of implementation, highlights 24 of these actions.

The committee of permanent representatives (CPR) to UN-Habitat held its first open-ended high-level midterm review since the new governance structure for the Strategic Plan 2020-2023 came into place from 29 June to 1 July 2021. Over 300 participants including the then President of the United Nations General Assembly Mr. Volkan Bozkir, the President of the UN-Habitat Assembly Ms. Martha Delgado Peralta, Ministers and Ambassadors took part in the meeting. The UN-Habitat Executive Director gave an update on results achieved so far in the implementation of the first two years of the UN-Habitat Strategic Plan 2020-2023, stressing that the President of the UN-Habitat Assembly Ms. Martha Delgado Peralta, Ministers and Ambassadors took part in the meeting.
UN-Habitat launches open sustainable urban mobility classroom to support cities to plan for low carbon, inclusive mobility systems

In a world where transport is responsible of a quarter of energy-related CO₂ emissions, road-related accidents cause more than 1.35 million fatalities annually, and outdoor air pollution results in 3.2 million premature deaths each year worldwide, there is a pressing need for a shift to sustainable mobility. To find solutions to these challenges, UN-Habitat, together with COP26 Programme Host, the City of Glasgow, and the Government of Ethiopia, has launched the Her City Toolbox for participatory public space planning and design.

Her City Toolbox is the digital next step in the #UrbanGirlsMovement initiative. It has gathered global best practices in participatory urban planning and design, operationalized and implemented urban planning processes. It helps the different urban stakeholders to better understand urban planning processes and to assess at which stages they need to participate to ensure that their voices are heard, and that the projects considered as part of the city’s vision, policies, strategies, plans and projects. The digital product aims to become a platform for knowledge exchange. Through the platform, users will be able to interact and communicate with each other, exchange knowledge, build partnerships and encourage peer-to-peer learning and feedback. Residents are encouraged to support and contribute to feedback, potential donors and investors interested in supporting the platform can contact javier.torner@un.org.

Act now! Help us rebuild lives

UN-Habitat needs your support to reach funds for people and communities most affected by the humanitarian crises in the Horn of Africa. You can help us reach those most affected by the multiple and complex crises, including conflicts and natural disasters. Your donation will go towards supporting the humanitarian response in the region to provide clean water, sanitation and shelter, and rebuild critical infrastructure to serve those most affected by humanitarian crises.

UN-Habitat's Urban Mobility team on

https://wuf.unhabitat.org/ or https://wuf11.katowice.eu/

UN-Habitat and the Global Covenant of Mayors for Climate & Energy (GCMM) invite everyone to the virtual InnovateCities (IC4) conference, a virtual multi-day global event bringing together science and innovation, policy and practice to enable cities to take accelerated and more ambitious climate action. The IC4 Conference will involve over 1,000 city leaders, scientists, researchers, innovators, academics, youth, and business leaders to advance pragmatic and action-oriented research and science that will help cities reduce their carbon footprint and increase resilience to climate change in a way that delivers socio-economic benefits and is socially inclusive. Click here to register.

We are happy to announce the new call for proposals for the Urban Thinkers Campus Phase 7 (UTC 7.0).

Deadline for applications: 20 October 2021 midnight (GMT)

Applications should be submitted online at the following link: HERE

InnovateCities 2021 Conference

The Eleventh Session of the World Urban Forum: Transforming our cities for a better urban future

The World Urban Forum (WUF) is the premier global conference on sustainable urbanization. WUF11 will be hosted by the Municipal Office of Katowice under the theme “Transforming Our Cities for a Better Urban Future.”

In order to mainstream and share the result globally, the WUF11 will provide greater insights and clarity on the future of cities based on existing trends, challenges and opportunities, and suggest ways cities can be better prepared to address future pandemics and a wider range of other shocks. A roundtable will be dedicated to the priorities of persons with disabilities, to provide them with an opportunity to share their knowledge and expertise to support decision-makers and urban stakeholders with keys steps towards inclusion and accessibility.

Registration for the event will be open soon. For more information, please see https://wuf11.katowice.eu/
**UN-Habitat uses art to build social cohesion between host community and migrants in La Marsa**

“it is not the difference of nationality that is important but the cultures and traditions of each other. It is an opportunity to get to know each other.” — said Cedric, one of the participants.

The city of La Marsa has undergone major urban upheavals in recent years and has welcomed an increasing number of sub-Saharan migrants, including workers, students, and families with young children. Together with Tunisie Terre d’Ailleurs and funded through the European Union and Savia cooperation, UN-Habitat project Mediterranean City to City Migrations (MC2C) has fostered social cohesion among migrants and host communities through art and creation activities. Talks, theatre, and urban fresco making were among the activities included in the workshops which engaged young people from the municipality of La Marsa and its outskirts. These activities were selected for their ability to facilitate learning a foreign language, as well as encourage intercommunity and intercultural exchanges. The activities took place at the youth complex of La Marsa, located in the heart of the city, in collaboration with the municipality of La Marsa. The youth complex provides a much-needed space for recreation, cultural exchange and social interaction, and will benefit from rehabilitation work under this project. A training course will be organised by Tunisie Terre d’Ailleurs targeting pneumatics from regional, local and community media, with a focus on migration-related challenges and migrants’ rights.

**Cities in Palestine are making effort towards safe and inclusive public spaces**

Palestinian communities lack safe and inclusive public spaces. The lack of proper planning and investment in public space has negatively impacted people’s quality of life, especially the most marginalized and vulnerable.

In 2014, UN-Habitat surveyed hundreds of spaces in East Jerusalem, Area C and Gaza Strip and selected six spaces for upgrading together with the communities. UN-Habitat worked with the local authorities, local organisations and communities in the co-design, execution, and management of these spaces. Using innovative participatory approaches, such as the Block by Block methodology, the project allowed communities to map their own-neighbourhoods and shared spaces. The public spaces that were upgraded are now accessible and enjoyable by 53,000 community members in Ramallah. UN-Habitat and partners have launched a project to create a social gathering space in the neighbourhood. The social space allows for small-scale planting by women to resemble familiar arches that mirror the existing facade of an old house at the site.

The City-wide public space assessments were conducted in each of the five cities which provided recommendations to inform the development of national and local policies and strategies. Capacity development sessions were conducted over 80 participants including the local government and over 50 data collectors were trained on the use of the tool and supported in collecting data for 60 open public spaces. The assessment focused on understanding the quantity, distribution and quality of public spaces.

These initiatives inform the development of the Sharaja Child- Friendly Open Public Spaces Guidelines which are intended to act as a starting point for the design and development of child-friendly and family-friendly open public spaces in the Emirate.

Residents of an informal settlement in northern Ghana receive support to tackle COVID-19

Samaria Abdullas’s 70-year-old mother-in-law believes that installing a water tank in the Shichegu neighbourhood has contributed immensely to improving the health of some members of the family. Before the water tank was built here, we used to walk long distance in search of water. The new and easy-to-use water tank left the women tired and free of the health complications.”

Residents of Ward 4 community in northern Ghana now have access to two handwashing stations and two water tanks to help them to tackle COVID-19. The WASH in Disaster Prone Communities (DPC) initiative was implemented in five zones in northern Ghana. About 300,000 people affected communities in 40 villages in the Upper East, Eastern and Brong Ahafo Regions now have access to resilient and flood-prone water supply infrastructure. This ground-breaking project brought together UN-Habitat, UNICEF, World Health Organisation (WHO), UN Development Programme (UNDP) with the office of the Resident Coordinator providing overall guidance and leadership for the project. Similar projects were undertaken in Accra Metropolitan Assembly, Ashaiman Municipal Assembly, Atwima Municipal Assembly, Ablekuma Central Municipal Assembly (all in Greater Accra) under COVID-19 response and recovery activities led by UN-Habitat through SIDA funding.

Planning sustainable and inclusive settlements for hosts and refugees in East Africa

Sub-Saharan Africa hosts more than a quarter of the world’s refugees. In East Africa, countries such as Kenya and Uganda hosting nearly 550,000 and 1.5 million refugees respectively. While both of these countries have experienced relatively stable political and economic environment, they remain some of the most resource-scarce countries in the world, with many refugees living in temporary camps for extended periods. UN-Habitat’s ‘Planning for Humanitarian Development Practice’ programme has been using urban planning as a tool to bridge the gap between humanitarian and development responses. The programme serves to provide solutions to explore ‘Alternatives to Camps’ and support their transformation into long-term sustainable settlements.

In both projects, UN-Habitat is applying the Settlers Profiling Tool, an instrument that guides city authorities and delivery partners to develop more inclusive, sustainable and effective urban projects aligned to the Agenda 2030. For example, in Lagos the tool has encouraged mainstreaming social inclusion since the beginning, several stakeholder engagement forums have been established to address the needs of affected communities and disadvantaged groups throughout different project stages.

Waste Wise Cities Tool Application Helps to Develop a Roadmap of Solid Waste Management in Mangaluru City, India

Mangaluru, with a population of 1,000,000 is the largest urban coastal city in Karnataka in Southern India. UN-Habitat is working with Mangaluru City Corporation (MCC) on circular resource recovery interventions under the project, "Waste Wise Cities Tool (WWCT) in Mangaluru". The WWCT is a tool developed by UN-Habitat (WWCT) to provide data to local authorities and governments for planning and implementation of solid waste management interventions.

Mangaluru City completed 30 toners of dry municipal solid waste of which 110 gooses for reconditioning recovery through formal and informal facilities. Over 30 resource recovery facilities were identified by UN-Habitat and based on the assessment results, four facilities were selected for assessment and capacity building. A detailed resource recovery assessment and operation strategies and circular investments were made.

“Data generated after the application of Waste Wise Cities Tool help the city in preparing a clear cut roadmap of solid waste management on the metropolitan scale with the help of researchers in the field and through interviews.” said Navdeep Bhandari, Commissioner, MCC.
Internally displaced families in Marawi given permanent houses

“What was important at that time, as gunshots were exchanged, was to get out of Marawi alive,” said Glandima Emran Dumambao. She still remembers the five-hour walk her family endured as they fled Tita Macaraig’s village, in what is officially known as the Islamic City of Marawi, after the siege started on 23 May 2017.

Four years after clashes between Government forces and pro-ISIS militants destroyed their old houses, Dumambao and her family finally have a home to call their own. They are among the 170 internally displaced families who, thanks to aid from the Japanese government, have moved into newly built houses in resettlement sites located in Dulay Proper and Mipaunig-Sagada, two barangays outside the city.

The families received the certificates for their new residences on July 2021 in a ceremony attended by UN-Habitat Country Programme Manager Christopher E. Rollo, Eduardo D. del Rosario, head of the Department of Human Settlements and Urban Development (DHSUD), ArnoLdo Ricardo Catling, President of the Social Housing Finance Corporation, and Mipaunig Mayor, Mayor of Marawi City.

Colombia considers UN-Habitat programme to mitigate refugee crisis

Over the past seven years, more than five million Venezuelans have fled their homeland. Many believed the migration would be a temporary but many believed the migration would be a temporary but while it is officially known as the Islamic City of Marawi, after the siege started on 23 May 2017.

New Projects reviewed by the Program Review Committee (January - August 2021)

Several new projects (67) with a total value of USD 242,773,655 were approved (many of them not fully funded) covering all regions between January and August 2021 contributing to the implementation of the Strategic Plan 2020-2023, the New Urban Agenda and the urban dimensions of the SDGs.

A breakdown of the distribution of projects and their dollar value is outlined below. The new projects are planned for implementation in several years, some going beyond the period of the current Strategic Plan. The budgets are therefore distributed accordingly.

**Projects value (USD) distribution by Region (Jan - Aug 2021)**

- **ROAF**
  - 7
- **ROAP**
  - 5
- **ROAS**
  - 3
- **ROLAC**
  - 2
- **EUROPE**
  - 1
- **GLOBAL**
  - 1

*The GFIN Umbrella project is approved as an umbrella project with a value of USD 45 Million, and significantly pushed the total value for projects generated by the Global office.

**Update on Results Framework and Reporting**

The Strategic Plan 2020-2023, which was approved by the United Nations Habitat Assembly in 2019, is in its second year of implementation. In order to ensure achievement of the results of the Strategic Plan, implementation is systematically monitored and reported. A process is underway to roll out a set of core indicators to facilitate reporting. More information on this, and on sharing results, will be featured in coming issues of Urban Impact.

The first Annual Report on the implementation of the latest Strategic Plan was published in May 2021. We are pleased to introduce in this issue of Urban Impact a table featuring a snapshot of highlights in support of the Strategic Plan from January to August 2021.
