FORUM**  
TWELFTH SESSION

# Why you should attend

This event presents a crucial opportunity to engage waste management stakeholders in meaningful conversations aimed at addressing the financial challenges in municipal solid waste management (MSWM) systems across African cities. The focus will be on developing and implementing tailored financial models with the backing of ACCP's extensive donor agency network.

Additionally, the event seeks to significantly broaden ACCP's reach by bringing in more partners, African countries, and cities to collaborate towards achieving sustainable waste management solutions. Don't miss this chance to contribute to impactful change and expand your network.
