Frequently Asked Questions (FAQ) - UN-Habitat Monthly Funding Status Report

Grant acquisitions refer to amount of funding indicated in signed contribution agreements or donors' grant letters.

3. How is the Monthly Funding Status Report different from UN-Habitat's financial reports?

Non-earmarked contributions are also included, though these are often received without formal contribution agreements.

Acquisition refers to the full value of a grant as recognized at the time of signing the contribution agreement or donor commitment, regardless of whether the funds will be disbursed in multiple tranches over several years. For grants signed in currencies other than US Dollars, the Funding Status Report records their value in US Dollars at the time of signing. However, the actual US Dollar amount received is subject to exchange rate fluctuations at the time of disbursement, which can result in differences between the figures reported in the Funding Status

The Funding Status Report does not include other revenue sources such as bank interest, write-offs, refunds, adjustments, internal transfers between accounts, and transactions related to administrative grant management. These revenue sources are included in financial reports but not in the Funding Status Report. As a result, the figures reported in the Funding Status Report and financial reports will not always

While the Monthly Funding Status Report includes some figures relevant for financial reporting-particularly those related to the regular

Instead, this report serves as a resource mobilization overview, providing insights into UN-Habitat's funding acquisition progress and trends,

The Monthly Funding Status Report provides an overview of the latest total value of grants and financial contributions acquired in the last month and cumulative acquisitions from the beginning of the year up to the last month of reporting. For example, the April 2025 report will cover acquisitions from 1 January to 30 April 2025 and will be produced in May. The exception is the full-year report, which is typically issued in March of the following year to account for financial adjustments and accounting processes undertaken between January and
