Frequently Asked Questions (FAQ) – UN-Habitat Monthly Funding Status Report

1. What is included in the Monthly Funding Status Report?

The Monthly Funding Status Report provides an overview of the latest total value of grants and financial contributions acquired in the last month and cumulative acquisitions for the beginning of the year until the last month of reporting. For example, the April 2025 report will cover acquisitions from 1 January to 30 April 2025 and will be produced in May. The exception is the full-year report, which is typically issued in March of the following year to account for late payments and accounting processes undertaken between January and March.

- Grant acquisitions refer to amount of funding indicated in signed contribution agreements or *donors' grant letters*.
- Non-earmarked contributions are also included, though these are often received without formal contribution agreements.

2. How is recognition different from revenue?

Acquisition refers to the full value of a grant as recognized at the time of signing the contribution agreement or donor commitment, regardless of whether the funds will be disbursed in multiple tranches over several years. For grants signed in currencies other than US Dollars, the value is recorded at the exchange rate at the time of signature. Subsequent changes in exchange rates are not reflected in the acquisition value. Revenue is recognized when the contribution is received, which can result in differences between the figures reported in the Funding Status Report and the revenue reports.

The Funding Status Report does not include other revenue sources such as bank interest, write-offs, refunds, adjustments, internal transfers between projects, or cancellations. Such transactions are recorded separately in financial reports. Revenue sources are recorded in financial reports, but not in the Funding Status Report. As a result, the figures reported in the Funding Status Report and financial reports will not always align.

3. How is the Monthly Funding Status Report for UN-Habitat's financial reporting?

While the Monthly Funding Status Report includes some figures relevant for financial reporting—particularly those related to the regular budget revenue—it is not a financial report.

Instead, this report serves as a resource mobilization overview, providing insights into UN-Habitat's funding acquisition progress and trends, rather than detailed financial accounting data.
