Grand Total				**74,842,650.51**

Frequently Asked Questions (FAQ) – UN-Habitat Funding Status Report

1. What is included in the Funding Status Report?

The Funding Status Report is published quarterly and provides an overview of the latest total value of grants and financial contributions acquired from the beginning of the year up to the last month of reporting. For example, the June 2026 report covers acquisitions from 1 January to 30 June 2026 and will be produced in July. The exception is the full-year report, which is typically issued in late March or early April of the following year to account for financial adjustments and accounting processes undertaken between January and March.

- Grant acquisitions refer to amount of funding indicated in signed contribution agreements or donors' grant letters.
- Non-earmarked contributions are also included, though these are often received without formal contribution agreements.

2. How is funding acquisition different from revenue?

Acquisition refers to the full value of a grant as recognized at the time of signing the contribution agreement or donor commitment, regardless of whether the funds will be disbursed in multiple tranches over several years. For grants signed in currencies other than US Dollars, the Funding Status Report records their value in US Dollars at the time of signing. However, the actual US Dollar amount received is subject to exchange rate fluctuations at the time of disbursement, which can result in differences between the figures reported in the Funding Status Report and the revenue reports.

From 1 January 2026, under updated international accounting standards IPSAS, revenue in Financial Reports is recorded only as funds are used for agreed activities, rather than when agreements are signed, while these Funding Status Reports will still show the total value of signed agreements for earmarked projects and core contributions received in cash. As a result, revenue figures in Financial Reports and funding acquisition figures in the Funding Status Report are not the same.

3. How is the Quarterly Funding Status Report different from UN-Habitat's financial reports?

Quarterly Funding Status Report provide insights into UN-Habitat's extrabudgetary funding acquisition progress and trends, enhances the transparency of UN-Habitat's grants signed, but does not serve as a financial report.
