- **Baselines, targets and timelines:**
 - Between 90–95% of baselines and targets are expected to be finalized ahead EB session in April 2026
 - Any remaining elements will be clearly explained and updated in subsequent reporting
 - The framework will function as a living instrument
 - Targets have been defined based on realistic assessments of available capacity, resources and programme pipelines
- **Attribution and contribution:**
 - Outcome level indicators are focused, where possible, on partner cities and countries directly supported by UN-Habitat
 - Narrative reporting will complement quantitative data to explain context, contribution pathways and external influencing factors
- **Outcome-indicator alignment:**
 - Indicators have been designed to capture observable intermediate results that are methodologically robust and measurable
 - Further refinement will continue to strengthen alignment, including through improved articulation of contribution pathways
- **Outputs vs. Outcomes:**
 - In certain areas, methodological constraints limit the ability to measure higher-level outcomes directly
 - Output-oriented indicators have been retained where they provide reliable and verifiable data
 - The Secretariat remains open to further guidance from Member States on strengthening outcome-level measurement
