

LSE Cities, UN-Habitat, and UCLG launch the 2015 edition of the 'Urban Governance Survey'

LSE Cities, UN-Habitat, and UCLG Committee on Decentralisation and Local Governance, are launching the 2015 edition of the **Urban Governance Survey**, an initiative to build a global database on current models of urban governance for public dissemination, comparative policy and research analysis. We invite local governments around the world to participate online between now and 30 September, 2015. Please visit <https://urbangovernance.net/en/survey-form> for more information on how to be part of this initiative and access to the questionnaire.

The Urban Governance Survey explores new and innovative ways of communicating and **mapping urban governance** to address the **'data challenge'** on the wide spectrum of different urban governance arrangements that are implemented around the world. And it establishes a platform for individual cities to identify international urban governance cases that are of particular relevance to their specific situations in order to foster **dialogue and exchanges of good practices** between cities.

78 cities from all world regions have already completed the survey during its first phase.

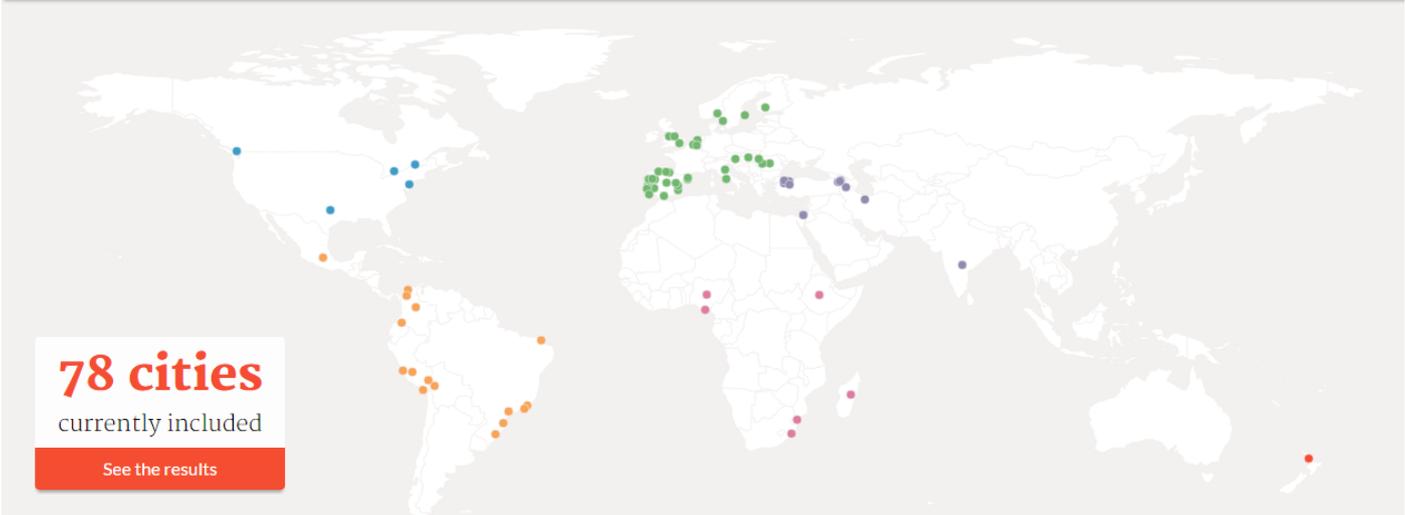

Be part of it!
Deadline for second phase is 30 September, 2015.

How Cities are Governed

Online platform and results for the 2014 Urban Governance Survey are now available: Explore the website!

We are happy to announce that the initiative's online platform '**How Cities are Governed**' is now available at <https://urbangovernance.net>. The results for the 1st phase of the survey can be explored through the dynamic and interactive interface, which also contains more in depth analysis of existing institutional arrangements and governance challenges faced by cities around the world. **We invite you to explore the visualization tools**, and hope the data collected and its analysis will be of your interest and assist further research and investigation on urban governance.

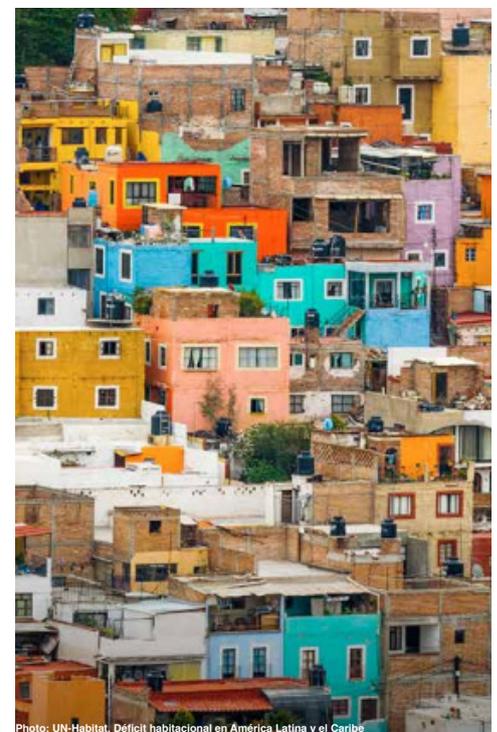

The Urban Governance Survey

As the world becomes increasingly urbanised, the urban agenda and, particularly, urban governance challenges also become central issues in global discussions. The survey was first launched in the summer of 2014 and 78 cities from all world regions completed it during this first round. Initial results of this survey have informed the **2014 Urban Age Conference** in Delhi, India which brought together a wide range of policy makers, academics and city experts.

In addition, the survey results will act as a backdrop for **UCLG's 4th Global Report on Decentralisation and Local Democracy** (GOLD IV, 2016), a publication that examines the situation of local governments around the world; the results will also be presented in various events such as the UCLG World Council during COP21 in December 2015.

We are very keen to include more cities in this analysis and on our website. Do not hesitate to contact us for further information at: survey@urbangovernance.net.
